2 BIRDS
SO NEEDS
COPYING

Pedigree of young birds GB24B48145 & GB24B48146.

Bred by Stuart Culbert of Barrow in Furness for the
STAG syndicate.

Sire of young birds GB15D44696 Blue C. Latebred in 2015. This C raced on the road for my former partnership Culbert & Hambling in the Barrow Homing Society. He was a sensational performer the winner of 5 separate club 1st prizes with a large number of other prize cards. He has numerous Federation positions racing in the Furness Federation to a poor location. He had won and taken a number of club and Federation positions before I relocated my loft. In my first season despite when letting my birds out (Roundabout system) they all used to disappear and fly over to their old loft it never stopped them winning. This pigeon was raced from our first channel race (remember them!) in the first season he was a broken pigeon, he was the only pigeon in the two races I entered that weekend that came to me from the West and was obvious he'd got confused at the end of his 384 mile race flying into a north west wind. It was obvious he went to the old loft, despite that he finished winning the club and 2nd Federation and 2nd Cumbria Combine Faliaise (Taking nothing away from the winning pigeon as that's pigeon racing). The following season after scoring regular inland he was again sent to the first channel race where he obliged by taking 1st Club, 1st Federation and 1st Cumbria Combine Faliaise 384 miles. He also managed to win an RPRA region award at the end of the season.

The Sire of GB15D44696 is GB14F04250. We simply call him Fifty. This is the one pigeon in the many that I have owned that I class as the best I've ever had to date. When Fifty was racing he was phenomenal, he also won 6 separate club races and many Furness Federation positions. It was from the channel races where he shone. He had a 2nd, 3rd & 7th Cumbria Combine from channel races over 384 miles. Not only that, he breeds winning pigeons, 44696 the best of them.

Fifty and his progeny are bred down from the Kees Bosua pigeons our partnership purchased in 2011, again at a Europa auction I was working.

13th - GB24B48145

19th - B43146

FINAL

Dam of young birds GB15D44689 Blue H. Latebred in 2015.

This hen had to bide her time before she could get in the stock

loft. This wasn't because she wasn't good enough it was because she hadn't topped the Furness fed
