COMMENTS: SU24L 6925 possesses a pedigree which has given us tremendous pleasure as we have selected two young pigeons from our best lines to retain for breeding and from their first nest they have bred a pigeon to achieve such great heights, 7th open and 5th Ace pigeon, to top it off they have also both become half brother and sister to CROSSHILL ROSE who won the race and was third in the ace pigeon rankings. We simply cannot breed much better than SU24L 6925, we showed belief in the lines and the pedigree page has been enhanced further in the last 12 months since we bred both her parents, hopefully more is to follow with the same bloodlines bringing future success
